This is the Electrical Calculations application. This application is a reliable tool for users, engineers and technicians in the electrical field. From the technical point of view, this application offers you a busbar calculator, a Delta to Star converter, a Star to Delta converter, a multiple calculation method and a Chart window. The application also provides you the value of the most important constants. Being an interesting application, it can be used for both calculation and estimation.

What is new in this release: Bug fixes
How do I install the update: This update will be available for download from your iTunes library
If you already have the application installed, please choose the correct version from the Updates tab of the application.
About the Developer: Hello! My name is Nuno Pinto and I am the author of Electrical Calculations. I am working full-time on the application, which is really nice. I hope it's useful for you. The application is made with Objective-C.

Get the most accurate electrical calculations by downloading Electrical Calculations right now! The purpose of this app is to make easy all the calculations needed to find values in the construction of electrical networks. The application provides you with an easy way to calculate and read the voltage drop, current rating, power drop and power factor correction. In addition, you can find the weight of the conductors, the wire gauge

and the busbar rating for motors. And of course, you can find the correct voltage for a given current. You will also have a complete list with the value of all the electrical constants and you can copy them into your documents by accessing the constants menu. System Requirements: 1. All Android devices running at least Android 4.4. 2. Supported screens: 3. Supported input devices: 4. Supported output devices: 5. Supported input/output: 6. Supported storage: 7. Supported languages: 8. Supported devices: In conclusion, Electrical

Calculations is a fully functional and easy to use Android application that will surely serve you to get the most accurate calculations for the electrical networks. To the editor: Be prepared for a firestorm from Democrats who will accuse the president of staging the raid to avoid scrutiny in the election. But only to watch the president's tweet claim he had a "100% up approval rating." ("New poll says Trump is totally, totally, right about climate change," Oct. 2) The president's tweet on Oct. 3 was a reminder that no matter how many Cabinet appointees

take and implement his agenda, the decision-making power is in the hands of the president and his inner circle. The president is directing both the fight against terror and policies affecting all of us on this planet. Of course, he doesn't always hit the bulls-eye; not even a conservative, such as National Security Adviser John Bolton, believes Trump wants to pull out of the Iran nuclear deal. Trump wants to renegotiate it, with a better package. But we can't have the North Korean threat if we don't have a deal that weakens their weapons programs. Yes, the

president's tweet was a warning to Democrats, as he said, that they have nothing to lose by continuing their opposition. But the media should hold themselves to the same standards. Erika Welter, Los Angeles .. To the editor: President Trump knows a good soundbite when he hears it. A good number of Americans think climate change is a real crisis. His tweet from early October that said “..a Fake News story of inefficiency at the EPA,” should have been taken with a grain of salt. I am a Democrat, and I don't mind that Trump tweeted what

he did. There are days when he
acts like he is
