How could we take football fans closer to the very best football players in the world? Our Approach At FIFA we pay attention to every detail. For FIFA 22, we started with our Champions Team, which were champions last year, and gave them extra detail. We also paid attention to the small things, like the way players lay down after shots, and on to individual touches and sprint speed. We used the data we gathered from all this work and the combined input of our dedicated development teams to create more realistic, more unpredictable, more fluid play.
