Ask HN: email webmail or webhosting? - jdl What do you use, what is your thoughts, and what factors do you consider when choosing an email service and web hosting provider? I know the market is crowded in the USA, but there are alternatives to Gmail, Hotmail and Yahoo! Mail. ===== itmag I have been using Fastmail for the last 2 years and really like it. It's pretty slick. I would recommend reading the articles (one of which is about Fastmail) on the site: [If you're seriously thinking of switching to another provider (I've done it before, mind you), it's more than possible to set up most major providers (648931e174

2.Q: How to avoid mixing Getter Setter in the same file Is there a good way to avoid mixing Getter and Setter in the same file? There is a method shown below that uses Getter and Setter for the same property. I have tried to put them in separate classes with the implementation of the Getter and Setter. But some of the properties are wired so that they are not ideal for this implementation. I wonder if there is a good way of solving this.

```
public class MyClass { public string  
    PropertyName1 { get; set; } public string PropertyName2 { get; set; } public  
    string PropertyName3 { get; set; } public string PropertyName4 { get; set; }  
    public string PropertyName5 { get; set; } } public class GetterSetter { public  
        string PropertyName1 { get { return this.PropertyName1; } set {  
            this.PropertyName1 = value; } } public string PropertyName2 { get { return  
            this.PropertyName2; } set { this.PropertyName2 = value; } } public string  
    PropertyName3 { get { return this.PropertyName3; } set { this.PropertyName3 =  
    value; } } public string PropertyName4 { get { return this.PropertyName4; } set {  
            this.PropertyName4 = value; } } public string PropertyName5 { get { return  
            this.PropertyName5; } set { this.PropertyName5 = value;
```
