Setup To get started, you first need to create a new character (we suggest starting your adventure with a level 20 character!) To do this you select the character you wish to make from one of four available classes. You have three skill trees that you can use to set your character up to be very different from your friends. There are also three paths available that you can choose from when you first enter the adventure. Each path has a story that you will follow. You could choose to follow the Adventure path, Quest path or Magic Path. To start the game you need to select the AdventureQuest 3D option. Once you have selected to begin you are directed to the Character Setup screen where you select your name, country, and age. Once you are ready, you are free to select what classes you wish to take. We highly suggest starting your adventure with the Warrior, Mage, or Archer (Barbarian) class. After choosing your classes, you need to make your choice on where to train. For the first time player, the skills in each tree will still be in a form of a tree. However, as you play through the game you will receive special quests that will unlock more skills and a different tree. For example, completing the beginner's quests will grant you the beginner's skills. Your main quest will focus on unlocking the advanced questgivers that will start in a tree that is a combination of your primary tree and a randomly generated one. You will also need to select an appearance for your character. Once you complete the choices for classes, skills, and training, you will be ready to do
